Journal of Membrane Science, 85 (1993) 317–318
Elsevier Science Publishers B.V., Amsterdam

Contents

Studies on distribution and reverse osmosis properties of cellulose acetate derivatives for organic compounds
H. Ohya, H. Jicai and Y. Negishi (Yokohama, Japan) 1
Pervaporation of water–acetic acid mixture through poly(4-vinylpyridine-co-acrylonitrile) membrane
Y.M. Lee and B.K. Oh (Seoul, South Korea) 13
Comparison of BSA adsorption and Fe sorption to the diol group and tannin immobilized onto a microfiltration membrane
M. Kim, K. Saito, S. Furusaki (Tokyo, Japan) and T. Sugo (Gunma, Japan) 21
Hydrogen transport through non-porous membranes of palladium-coated niobium, tantalum and vanadium
R.E. Buxbaum (East Lansing, MI, USA) and T.L. Marker (Des Plaines, IL, USA) 29
Analysis of steric hindrance reduction in pulsed protein ultrafiltration
V.G.J. Rodgers and K.D. Miller (Iowa City, IA, USA) 39
Separation of water–ethanol mixtures by pervaporation through composite membranes prepared by concentrated emulsion polymerization: Improvement of the permeation rate with a porogen
F. Sun and E. Ruckenstein (Buffalo, NY, USA) 59
Molecular weight distribution of methyl methacrylate grafted onto a microfiltration membrane by radiation-induced graft polymerization
H. Yamagishi, K. Saito, S. Furusaki (Tokyo, Japan), T. Sugo, F. Hosoi and J. Okamoto (Gunma, Japan) 71
Association behavior in copolymer blend membranes and the pervaporation of water/ethanol mixtures
W.H. Jo, Y.S. Kang and H.J. Kim (Seoul, South Korea) 81
Facilitated transport of ethene through Nafion membranes. Part I. Water swollen membranes
O.I. Eriksen, E. Aksnes and I.M. Dahl (Oslo, Norway) 89
Facilitated transport of ethene through Nafion membranes. Part II. Glycerine treated, water swollen membranes
O.I. Eriksen, E. Aksnes and I.M. Dahl (Oslo, Norway) 99

Meeting Announcement 107
Meetings Calendar 108

Study of protein transmission through ultrafiltration membranes
M. Balakrishnan, G.P. Agarwal (New Delhi, India) and C.L. Cooney (Cambridge, MA, USA) 111
Hollow fiber membrane based on polyacrylonitrile with a high degree of polymerization and its properties
M. Henmi and T. Yoshioka (Shiga, Japan) 129
Computer simulations of mass transfer in the concentration boundary layer over ultrafiltration membranes
C. Rosén and C. Trägårdh (Lund, Sweden) 139
Modelling of the competitive permeation of cobalt and nickel in a di(2-ethylhexyl)phosphoric acid supported liquid membrane process
R.-S. Juang (Taoyuan, Taiwan) 157
Control of the pore characteristics of thin alumina membranes with ultrafine zirconia particles prepared by the reversed micelle method
T. Yamaki, H. Maeda, K. Kusakabe and S. Morooka (Fukuoka, Japan) 167
Liquid membrane transport of alkali metal cations with mixed carrier systems composed of phosphoric acid–crown ether having a side arm
Y. Habata, K. Uchida, Y. Sato and S. Akabori (Chiba, Japan) 175
Electrotransport of protons and chloride ions in anion exchange membranes for the recovery of acids. Part I. Equilibrium properties
I. Tugas, G. Pourcelly and C. Gavach (Montpellier, France) 183
Electrotransport of HCl in anion exchange membranes for the recovery of acids. Part II. Kinetics of ion transfer at

the membrane–solution interface
G. Pourcelly, I. Tugas and C. Gavach (Montpellier, France) 195
Transport of lactic acid through reverse osmosis and nanofiltration membranes
J.M.K. Timmer, H.C. van der Horst and T. Robbertsen (Ede, Netherlands) 205

Letters to the Editor 217
Meetings Calendar 219

Enantioselective transport of amino acid through supported chiral liquid membranes
M. Bryjak, J. Kozłowski (Wroclaw, Poland), P. Wieczorek (Opole, Poland) and P. Kafarski (Wroclaw, Poland) 221
A membrane reactor for the production of styrene from ethylbenzene
B.K. Abdalla and S.S.E.H. Elnashaie (Riyadh, Saudi Arabia) 229
Precise analytical model of hollow fiber reverse osmosis modules
M. Sekino (Iwakuni, Japan) 241
Nanoporous carbon membranes for separation of gas mixtures by selective surface flow
M.B. Rao and S. Sircar (Allentown, PA, USA) 253
Baffled membrane modules made with hollow fiber fabric
K.L. Wang and E.L. Cussler (Minneapolis, MN, USA) 265
Chemical vapor deposition of hydrogen-permselective silica films on porous glass supports from tetraethylorthosilicate
H.Y. Ha, S.W. Nam, S.-A. Hong (Seoul, South Korea) and W.K. Lee (Taejeon, South Korea) 279
The use of catalytically active pervaporation membranes in esterification reactions to simultaneously increase product yield, membrane permselectivity and flux
L. Bagnell (Clayton, Victoria, Australia), K. Cavell (Hobart, Tasmania), A.M. Hodges, A.W.-H. Mau and A.J. Seen (Clayton, Victoria, Australia) 291

Rapid Communication
Integral asymmetric poly(vinylidene fluoride) (PVDF) pervaporation membranes
K. Jian and P.N. Pintauro (New Orleans, LA, USA) 301
